DETAILED ACTION

Product by Process 102/103

Products by Process claims are NOT limited to the manipulations of the recited steps only to the structure implied by the steps.

Claims 35-50 are rejected under 102(e) as being anticipated by Buscemi et al. 5,500,013 or in the alternative under 35 USC 103(a) as obvious over Buscemi et al.

Buscemi et al. has disclosed each and every structural element as set forth in claims 1-36, 38-44, 46-50 including a thread/filament (18) for a vascular stent (10) capable of being implanted in vessels wherein the thread/filament; comprising a first biodegradable polymer 5:65-67; wherein a layer of a second biodegradable polymer contains a drug 12:40-43. Including melt spinning 12:40-43. However Buscemi et al. is silent as to the method of "using screw extruders and drawing a resulting thread". Once a product appearing to be substantially the same or similar is found, a 35 USC 102/103 rejection may be made and the burden is shifted to applicant to show an unobvious difference. See MPEP 2113. A statement or argument by the attorney is not factual evidence. See MPEP 716.01

Thus, even though the Buscemi et al reference is silent as to the process of using a screw extruder and drawing a resulting thread, it appears that the product in reference would be the same or similar as that claimed because Buscemi et al. does teach that melt processing.
